ROYAL UNLIMITED PAY PLAN CODED ENROLLER TREE

The example above is a sample tree that depicts how the Group 1 and 2, Level 1 coded tree is built. If we were determining the Generation 2 coded ID for Richard, when looking up the Enroller Tree, Bob is the first Royal Member that is in the Group 2 of their Level 1 coded, and so that means that Bob’s enroller Denise is Richard’s Generation 2 coded ID (this would be the same for Mary, Brian, and Maria, as well as any other Group 1 coded accounts below them, no matter how deep it went.). If we were determining the Generation 2 Coded ID for Anne or Derek, their enroller is in Group 2, and so they would be coded to their enroller, Bill’s enroller Bob for Generation 2 (this would be the same for any other Group 1 IDs below them as well).
